1. INTRODUCTION

Southwest Processors, Inc. opened in 1963 and since then the ownership has prided itself on promoting sustainable water treatment. The system may have been started in 1963 but over the years Southwest Processors has retrofitted the system to not only meet but exceed all the necessary standards set by Federal, State, and Local Agencies. The facility was designed to manage the wastewater generated by local rendering plants but has evolved to manage wastewater generated by many industries.

2. ACCEPTED WATERWATER APPROVED FOR TREATMENT

Vehicle Wash Wastewater

- Car Wash Wastewater
- Heavy Truck and Equipment Wash

Process Wastewater

- Drinking water softener processing wastewater
- Pipeline flush wastewater
- Boiler blowdown
- Hydrostatic test water
- Construction cleanup wastewater
- Cooling water from injection molds
- Domestic trash hauling, tipping floor cleanup wastewater
- Wastewater used in cutting/polishing of marble and stone
- Wastewater from corrugation operations (some testing may be required)
- Wastewater from fiberglass production
- Produce Washing
- Fish, Meat and Poultry Washing
- Grain
- Brewery and Distillery
- Soft Drink Processing
- Grease Trap/Interceptor

Contaminated groundwater clean-up from non-hazardous sources (Groundwater from Superfund sites may not be accepted)

Additional types of waste can be considered for treatment at Southwest Processors. Our screening process occasionally requires additional lab analysis to determine if the waste stream is acceptable and treatable at our facility. These precautions protect you and ensure compliance with both state and federal regulatory agencies.

3. PRODUCT DESTRUCTION

Southwest Processors product destruction service focuses on destroying foods, beverages and various other items. There are numerous reasons why a product is no longer consumable or marketable. Often these items are off-spec, expired, contaminated, or even a trademark

infringement occurred. Products can be imported as well as domestic. We make it our highest priority and take every precaution to completely destroy these products in order to keep them off the market while protecting the public as well as manufacturers.

Sometimes product destructions need to be witnessed by your company representative or supervised by a government agency such as FDA, U.S. Customs or USDA. For over 20 years **Southwest Processors** have been accommodating these types of witnessed destruction. We provide portable viewing booths, equipped with desk tops, heating and air conditioning, just for this reason. Additional services offered are digital video and/or digital photos of the destruction, as well as a certificate of destruction, on request. We will be glad to schedule an appointment for a supervised destruction. Simply let us know your specific needs when scheduling an appointment and we will be glad to accommodate you.

When the product is delivered and accounted for, we begin the destruction process. If the destruction is not completed within the day, the products are locked in our warehouse, and then the destruction resumes the next day. Our site is monitored 24 hours a day by closed circuit cameras.

4. PRE QUALIFICATION QUESTIONNAIRE AND SAMPLE

1. Prior to accepting a waste stream for treatment, **Southwest Processors Inc.** must obtain information from the generator which will enable **Southwest Processors, Inc.** to determine if the water is suitable for treatment. The prequalification questionnaire form will give information on the waste generator, the process generating the waste, and physical and chemical characteristics of the waste. We have personnel to assist or answer any questions regarding this form.

2. A representative sample of the wastewater being considered for disposal is required to evaluate treatability. An approximate 16oz sample is sufficient for testing. After evaluating the sample we can determine if the waste is compatible with our facility, or if further lab analysis is required.

Southwest Processors, Inc. is a permitted Centralized Water Treatment facility and strictly follows all regulations established by the United States Environmental Protection Agency, State of California and the Sanitation Districts of Los Angeles. The County Sanitation Districts inspectors have full access, at all times, to monitor our facility. We take our responsibility seriously to ensure your water is being treated in the most careful and accountable manner.

5. TRANSPORTATION

For over five decades, Southwest Processors, Inc. has maintained a small fleet of vacuum tankers for transporting non-hazardous liquid waste. Our trucks range from 2500 gallon bobtails to 5400 gallon tankers. All of our trucks have the required inedible kitchen grease transporter permits issued by the California Department of Food and Agriculture.

Southwest Processors services all of Southern California. We can provide estimates for both transportation and disposal of your non-hazardous wastewater.

Since opening our facility in 1987, **Southwest Processors** has enjoyed a long history dedicated to working with liquid waste transporters and environmental professionals. On request, we will gladly refer you to a number of water transporters currently transporting wastewater to our facility. We recognize prompt and reliable service is most important to our customers.

6. OPERATING AUTHORITY

Permit/License/Certification Name:	Issued By	Identification No.
